SUMMARY

Software Engineer with **6+ years of experience** in **Full Stack Development**, building Angular & React frontends, .NET Core & Node.js backends, with SQL/MongoDB databases and cloud deployments on AWS & Azure.

EDUCATION

San Jose State University

Master of Science in Computer Science & Software Engineering

Jan 2024—Present

3.8/4

Anna University

Bachelor of Engineering in Electronics & Communication Engineering

Aug 2013—May 2017

8.19/10

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, Java, C#, C, C++, HTML5, CSS, Data Structures, Algorithms
- **Frameworks & Libraries:** Angular, React.js, Next.js, Express, .Net Core, Spartacus, SpringBoot, Tailwind CSS, Bootstrap
- **Backend & APIs:** Node.js, GraphQL, Kafka, NGINX, RESTful APIs, Microservices
- **Databases:** SQL Server, MySQL, MongoDB, Neo4j, Cassandra
- **Cloud & DevOps:** AWS, Azure, Docker
- **Tools & Platforms:** VS Code, IntelliJ Idea, GitHub, POSTMAN, SourceTree, BitBucket, Cursor, Jira, Asana, ClickUp
- **Machine Learning Tools:** TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, Data Preprocessing, , OpenAI APIs

WORK EXPERIENCE

Keysha Mind Inc.,

Software Engineer Intern

May 2025—Aug 2025

- Developed the **Book a Meeting** feature from scratch using **Next.js, React.js, Node.js, Figma** and integrating backend APIs.
- Revamped UI components, optimized backend processes, and **integrated AI services** to enhance user experience.

Cognizant Technology Solutions India Pvt. Ltd.,

Software Engineer

July 2021—April 2023

J&J Customer Connect

Client: Johnson & Johnson

- Built responsive e-commerce platform with **Angular** and **Spartacus**, supporting 20k+ users and improving load time by 25%.
- Designed and implemented CMS components in Angular Spartacus to deliver a scalable, maintainable main page.
- Collaborated with stakeholders on root cause analyses, user acceptance testing, ensuring application quality and reliability.
- **Mentored** 3 new hires; **interviewed** around 50 potential candidates.

VaccineShope eCommerce Portal

Client: Sanofi

- Led 3 developers to deliver critical **cart, checkout, and order** modules, ensuring full-cycle development and on-time rollout.
- Independently adopted and implemented the **Spartacus** framework with **Angular** storefront to fulfill user-specific requirements.
- Implemented multilingual support across the application, significantly improving user accessibility.
- Managed Agile sprint planning, prioritizing user stories and story points estimates in Jira.
- Coordinated with the SAP Hybris backend team for API integration in the frontend.

Accenture Services Pvt. Ltd.

Software Developer

November 2017—June 2021

RIAD – Risk, Issues, Action, and Decision

- Architected and developed interactive single-page applications using **Angular, HTML5, CSS**, and **Bootstrap**, with backend integration using **C#, .NET Core**, and databases (**MongoDB, SQL Server**), streamlined through CI/CD pipelines.

My-Wizard Resource Management

- Built resource management web pages using Angular 8 for onboarding/offboarding workflows.
- Provided critical support during sprint spillovers and surge periods, resolving key issues to maintain project delivery.
- Led re-platforming of the Mobilization Management application from SharePoint to ASP.NET MVC.

Finserv Technologies Pvt. Ltd.

.NET Developer Intern

June 2017—October 2017

- Supported backend development for financial applications using .NET frameworks.

ACADEMIC PROJECTS

- **Anomaly Detection in Microservices with GNNs:** Built a Transformer-based system integrating logs, metrics, and traces to detect anomalies by modelling spatial & temporal dependencies across services. Overcame SAM/TAM limits, enabling early identification of failures for proactive mitigation.
- **Weather Forecasting using Transformer Models:** Engineered Stormer transformer with AdaLN & custom loss for atmospheric prediction on ERA5 data, improving multi-interval forecasts.
- **Distributed Blog Design and Implementation:** Designed a fault-tolerant blog system using ZooKeeper, Kafka & partitioned storage with replication for dynamic failover.
- **AI-Powered Content Creator:** Built an AI platform with ChatGPT & DALL·E for automated social posts, using React with SEO & personalization to boost engagement.
- **Scalable MongoDB Sharded on AWS:** Deployed a 3-shard MongoDB cluster with replica sets on AWS, implemented range-based sharding for optimized data distribution, and documented query tuning.
